The Trusted Name in Motorcycle Carriers

Mighty Hauler™ Motorcycle Carriers

Always wanted to take your motorcycle with you but you thought it was too big? Tired of pushing your 800lb. motorcycle up a ramp? Always had to decide between your motorcycle or the family car?

Then Mighty Hauler™ is the solution for you! Mighty Hauler™ will easily attach to any 2" hitch receiver. Now you can take your favorite motorcycle and the family car with you on camping trips. Mighty Hauler's™ 1000 series will support a bike up to 1000lbs. Or you can choose to take two smaller scooters with you. Simply drive your motorcycle on the Mighty Hauler™, strap it down, jack it up, and your ready to begin your trip. If you have an extra long bike or wide tires, there is a Mighty Hauler™ for you. Custom work is not a problem. Mighty Hauler™ offers great accessories such as wheel chocks, floorboards and storage dolly's.

Sway Lock™

Mighty Haulers™ Sway Lock™ technology allows carriers to remain firm without having to strap the carrier to your vehicle.

Flat Towing

When flat towing a car behind your camper our three point hitch is required. Also, an installed vehicle breaking system is needed.

Hitch Rating

Class V hitch is required for carrier motorcycles. Class A camper with a Class III hitch must upgrade to the three point hitch.

Models

1000M

Manually raises and lowers up to 1000lbs.

1000H

Uses electric hydraulics to raise and lower up to 1000lbs. with a touch of a button

Mighty Hauler's™ Strongest Unit Yet

The 1000C and 1000CH are the perfect carriers for diesel pushers. All you need to do is pull two pins and the 1000C collapses 17.5" making it easy to access your engine compartment. When the 1000C is on the ground it only measures 32.5" tall. The first pin you pull allows you to fold the jack out of the way without taking it off. Pulling the second pin allows you to take the 17.5" upright support off. This support can be removed when the carrier is in the up or down position. Whether you have a hatch door or barn door to your engine compartment, opening up the doors is no longer a problem.

The 1000C is Mighty Hauler's strongest unit yet. It travels using a T Channel which allows us to make the overall height of the unit much smaller while upgrading the strength. The T Channel is also has a fail proof design made from 1/4" plate. Everything on this unit has been reinforced. We added strength for towing by using two Sway Lock pins so the load is pulled through the whole unit and not just the T channel. These pin holes are reinforced with 3/8" plate. This means no back and forth sway when traveling and towing.
